Chosen Option : C

Q.3

Answer the question following the text.

Recent research indicates that increased consumption of fruits and vegetables by middle -aged people reduces their susceptibility to stroke in later years. The researchers speculate that this may be because fruits and vegetables are rich in folic acid. Low levels of folic acid are associated with high levels of homocysteine, an amino acid that contributes to blocked arteries.

Which one of the following statements is most strongly supported by the information above?

- (a) An increased risk of stroke is correlated with low levels of homocysteine.
(b) A decreased risk of stroke is correlated with increased levels of folic acid.
(c) An increased propensity for blocked arteries is correlated with decreased levels of hormone.
(d) A decreased propensity for blocked arteries is correlated with low levels of folic acid.

Q.16

Choose the appropriate title for the given passage:

Once there was a boy who lived with his grandfather, grandmother, and aunts. One day the father bought a monkey for five rupees from a Tonga -driver and named it 'Toto'. Grandfather decided he would add the little fellow to his private zoo. Toto was a pretty monkey who was mischievous as well. But grandmother didn't like pets, she always screamed if she saw one inside the house. So the boy and his grandfather decided that the presence of Toto must be kept a secret. Toto was tied to a peg fastened to the wall. In an attempt to get free, it tore the wall papers and curtains. The next day grandfather had to go to Saharanpur for collecting his pension. He could not take the risk of leaving Toto with his grandson and so he took along with him. The boy tried really hard to convince his grandmother to keep Toto as a pet, and finally, she agreed. She decided to let Toto stay in the stable with Nana, their donkey.

- (a) Grandfather and Grandmother
- (b) Toto : The Monkey
- (c) My Pets
- (d) Nana
