

CUET UG - 2022
(CANDIDATE RESPONSE SHEET)

Paper/Subject PSYCHOLOGY
Exam Date 25 Aug 2022
Exam Slot 2

Question ID:1185701
Section Name:PSYCHOLOGY
Question:

According to Freud, which element of personality does not care for moral values, society or other individuals ?

- (1) Super ego
- (2) Ego
- (3) Id
- (4) Libido

- A 1
- B 2
- C 3
- D 4

Answer Given By Candidate:C

Question ID:1185702
Section Name:PSYCHOLOGY
Question:

Match List - I with List - II.

- | List - I | List - II |
|-------------------------|---------------|
| (A) Self-Efficacy | (I) Cattell |
| (B) Real Self | (II) Maslow |
| (C) Self-Report measure | (III) Bandura |
| (D) Self-Actualization | (IV) Rogers |

Choose the **correct** answer from the options given below :

- (1) (A) - (I), (B) - (II), (C) - (III), (D) - (IV)
- (2) (A) - (II), (B) - (IV), (C) - (III), (D) - (I)
- (3) (A) - (IV), (B) - (II), (C) - (I), (D) - (III)
- (4) (A) - (III), (B) - (IV), (C) - (I), (D) - (II)

- A 1
- B 2
- C 3
- D 4

Answer Given By Candidate:D

Question ID:1185703
Section Name:PSYCHOLOGY

Question:

Street Smartness' is a part of :

- (1) Multiple Intelligence
- (2) Contextual Intelligence
- (3) Experiential Intelligence
- (4) Componential Intelligence

A 1

B 2

C 3

D 4

Answer Given By Candidate: **B**

Question ID:1185704

Section Name:PSYCHOLOGY

Question:

The important ideas proposed by Carl Rogers and Abraham Maslow are :

- (A) People have a tendency to maximise self concept through self actualisation.
- (B) There is a collective unconscious consisting of archetypes
- (C) Behaviour is goal directed and worthwhile people try to express capabilities, potentials and talents to the fullest possible extent.
- (D) An atmosphere of unconditional positive regard must be created in order to ensure enhancement of one's self concept.
- (E) Human beings display a wide range of variations in psychological attributes (and it is possible)

Choose the **correct** answer from the options given below :

- (1) (A), (B), (D) only
- (2) (B), (C), (E) only
- (3) (A), (D), (E) only
- (4) (A), (C), (D) only

A 1

B 2

C 3

D 4

Answer Given By Candidate: **Not Attempted**

Question ID:1185705

Section Name:PSYCHOLOGY

Question:

The clinical psychologist assessed person B's personality using a test based on less structured stimuli. The test helped to assess his unconscious motives and feelings. Identify the test used by the psychologist.

- (1) Self report measure
- (2) Projective Technique
- (3) Behavioural Analysis
- (4) Psychometric test

- A 1
- B 2
- C 3
- D 4

Answer Given By Candidate: **B**

Question ID: **1185706**

Section Name: PSYCHOLOGY

Question:

In _____ a person defends against anxiety by adopting behaviours opposite to her/his true feelings.

- (1) Projection
- (2) Reaction formation
- (3) Rationalisation
- (4) Regression

- A 1
- B 2
- C 3
- D 4

Answer Given By Candidate: **B**

Question ID: **1185707**

Section Name: PSYCHOLOGY

Question:

_____ has been found extremely useful in career guidance, vocational exploration and occupational testing.

- (1) Minnesota Multiphasic Personality Inventory
- (2) Eysenck Personality Questionnaire
- (3) Sixteen Personality factor Questionnaire
- (4) Sentence Completion Test

- A 1
- B 2
- C 3
- D 4

Answer Given By Candidate: **Not Attempted**

C 3

D 4

Answer Given By Candidate: **B****Question ID:1185741****Section Name:PSYCHOLOGY****Question:**

Read the passage given below to answer.

In our day-to day life, we assign certain causes or reasons to a person's behaviour. This process is called attribution. Broadly, causes of a person are attributed to internal and external factors. Internal factors are related to situation. With reference to success and failure, Weiner has classified causes into internal/external and stable/unstable factors. In general, people attribute success to internal factors such as their ability and hard work. However, failure is attributed to external factors such as task difficulty and bad luck. Ability/fate and hard-work/task-difficulty are considered as stable and unstable factors respectively. Stable factors refer to those causes that do not change with time. It has been observed that people have a tendency to give greater weightage to internal factors than external one. This phenomenon is called the fundamental attribution error. This tendency is stronger in some cultures than in others. Research suggests that Indians tend to make more external attributions than Americans do.

Match **List - I** with **List - II**.

List - I	List - II
(Characteristics)	(Causal factors)
(A) Task characteristics	(I) Internal-stable
(B) Hard work	(II) External-stable
(C) Fate	(III) Unstable-Internal
(D) Ability	(IV) Unstable-External

Choose the **correct** answer from the options given below :

- (1) (A) - (I), (B) - (II), (C) - (III), (D) - (IV)
- (2) (A) - (II), (B) - (IV), (C) - (III), (D) - (I)
- (3) (A) - (III), (B) - (I), (C) - (IV), (D) - (II)
- (4) (A) - (IV), (B) - (III), (C) - (II), (D) - (I)

Read the passage given below to answer.

A person's thinking or behaviour is classified as abnormal if it violates social norms. Norms are expected behaviour in a group. Every culture has certain standards for accepting behaviour as per socially acceptable norms. For example - child marriage was a norm about hundred years ago. Those who did not marry their girl child like everyone else were considered to be breaking the norm. The most obvious problem with defining abnormality using social norms is that there is no universal agreement over social norms. Another definition of abnormality states that a person is considered abnormal if he/she is unable to perform the behaviours necessary for day-to-day living eg. self care, holding a job, managing everyday tasks. We must understand that mental health issues are prevalent in all cultures as there is ignorance and fear about psychological disorders. It is believed that these

'A person's thinking or behaviour is classified as abnormal if it isolates social norms'. This statement refers to the concept of _____ in Abnormal Psychology.

- (1) Deviance
- (2) Distress
- (3) Dysfunction
- (4) Danger

A 1

B 2

C 3

D 4
